SUMMARY

Senior Software Engineer with over 7 years of experience in backend development and cloud architecture. Specialized in building scalable microservices, distributed systems, and implementing DevOps practices. Strong background in system reliability, performance optimization, and leading technical teams to deliver high-quality software solutions.

SKILLS

Proficient:

Go, Java, Python, Node.js, REST APIs, gRPC, Microservices, AWS, Docker, Kubernetes, Terraform, CI/CD, Helm, Serverless, PostgreSQL, MySQL, Redis, MongoDB, DynamoDB, SQL Optimization, Unit Testing, Integration Testing, E2E Testing, TDD, Test Automation, Technical Leadership, Mentoring, Agile Methodologies, Code Reviews, System Design

Intermediate:

Kafka, RabbitMQ, AWS SQS, WebSockets, Event-Driven Architecture, Prometheus, Grafana, ELK Stack, Jaeger, Datadog, CloudWatch

PROFESSIONAL EXPERIENCE

Senior Backend Engineer

TechCorp Solutions, São Paulo, Brazil -- Hybrid | March 2022 - Present

Core Responsibilities:

- Led the migration of monolithic architecture to microservices, reducing system latency by 40% and improving scalability
- Designed and implemented event-driven architecture using Kafka, processing over 1 million events daily
- Mentored 3 junior developers and established coding standards and best practices for the team
- Optimized database queries and implemented caching strategies, improving API response times by 60%
- Collaborated with DevOps team to implement GitLab CI/CD pipelines, reducing deployment time from 2 hours to 15 minutes

Key Technologies and Tools:

Go, Kafka, PostgreSQL, Redis, Kubernetes, AWS, Terraform

Software Engineer

InovaTech Startups, Remote -- Remote | January 2020 - February 2022

Core Responsibilities:

- Developed and maintained RESTful APIs serving mobile and web applications with over 500,000 users
- Implemented real-time features using WebSockets and Redis pub/sub for live notifications
- Built automated testing suite with 90% code coverage, significantly reducing production bugs
- Participated in on-call rotation and implemented incident response procedures
- Contributed to open-source projects and internal libraries used across multiple teams

Key Technologies and Tools:

Java, Spring Boot, Redis, MySQL, Docker, AWS EC2, JUnit

Junior Developer

Digital Solutions Lab, Campinas, Brazil -- On-site | June 2018 - December 2019

Core Responsibilities:

- Developed features for web applications using modern JavaScript frameworks and backend APIs
- Participated in code reviews and agile development processes (Scrum)
- Wrote comprehensive documentation for APIs and system architecture
- Assisted in database design and optimization for new features
- Collaborated with frontend team to ensure seamless integration between services

Key Technologies and Tools:

Python, Django, JavaScript, PostgreSQL, React, Git

EDUCATION

Bachelor of Computer Science

University of São Paulo (USP), São Paulo, Brazil | 2014 - 2018

Thesis: Performance Analysis of Microservices Communication Patterns in Cloud Environments

Technical Course in Software Development

ETEC Technical School, São Paulo, Brazil | 2012 - 2013

CERTIFICATES

AWS Certified Solutions Architect - Professional

Amazon Web Services | 2023

Certified Kubernetes Administrator (CKA)

Cloud Native Computing Foundation | 2022

Google Cloud Professional Developer

Google Cloud | 2021
